Park User Statistics

FISCAL YEAR SUMMARY

Alberta

RECREATION AND PARKS
Parks Division

PREFACE

This report represents the first edition of the "Park User Statistics - Fiscal Year Summary". The new reporting structure also includes the production of two other documents: 1) the Monthly Camping Statistic Summaries throughout the peak season, and; 2) the Peak Season Summary available in approximately November of each year.

In the past, the Park user Statistics Handbooks (P.U.S.H.) were produced in April of each year including both the previous peak season park user statistics, and fiscal year summary of two years previous. As a result, the peak season information was not available to assist in management decision-making during the year that statistics were collected, and consequently lost much of its utility in the long term. The new reporting structure, however, has been designed to facilitate earlier production of park user statistics at a time more appropriate for comparisons against budget preparation cycles, manpower planning, program planning, monitoring and evaluation.

At the present time, the Parks Division of Alberta Recreation and Parks, collects park visitation information through three basic systems: 1) Park User Statistics Summary (P.U.S.S.) sheets, 2) Provincial Recreation Area Vehicle Counts, and 3) Day Use - Automatic Traffic counters. These collection systems are supported by several sub-systems which include camping permits and survey methodologies. These collection systems are discussed in the introduction section.

Data for this report have been collected at the management unit level for Provincial Parks, Sub-Districts within Kananaskis Country, and Provincial Recreation Areas (P.R.A.'s). For each of these levels, appropriate park user statistics for camping and day use are included. Area Level Statistics (i.e. campgrounds, day use areas, group use areas), although not reported in this summary, are available upon request.

INTRODUCTION

Implementation of the revised P.U.S.C. System, following a revision study, occurred in April 1986. This report presents Park User Statistics for the period of April 1, 1986 to March 31, 1987. It is important to note that this represents a change from past Park User Statistics Handbooks which were based upon the period May 15 to September 15, and consequently did not include off-season statistics. Information is presented for all Provincial Parks, Sub-Districts within Kananaskis Country and Provincial Recreation Areas, at the management unit level. Sub-management unit level statistics (e.g. individual campground statistics) will not be reported in the Fiscal Year Summary, but are available upon request.

Tables summarizing camping, day use, group use, and Provincial Recreation Area statistics are included in this report. The definitions of some related terms have been changed so that the reported statistics are more easily understood. In addition, new definitions are considered to be more in line with those of other provinces, therefore resulting in more comparable statistics. A glossary of terms has been provided (see pages 9 to 11).

Provincial Parks/Sub-Districts differ from Provincial Recreation Areas (P.R.A.'s) in terms of the respective sub-systems used to collect park visitation information. The difference is based upon the fact that Provincial Parks are characterized by both camping permit sales and a resident manpower contingent, whereas Provincial Recreation Areas, for the most part, are not. As a result, for Provincial Parks, the following information is presented, whenever appropriate: 1) camping, including camping party nights, individual camper nights, parties turned away, campground occupancy data, group camping use; and 2) day use including day use parties and individual day users.

For the 1986/87 fiscal year, however, P.R.A.'s, could not depend on either camping permits or resident manpower for the collection of user statistics and therefore statistics are based on more of a survey approach. Consequently, only "best" estimates of camping party nights, individual camper nights, day use parties and individual day users are reported for P.R.A.'s, and are available for the peak season only.

Camping Statistics

Camping statistics are based upon information obtained from camping permits. These permits are issued via three systems: the Standard Camping Permit, the Self-Registration Permit (envelope), and the Group Use Permit, systems. Information collected through these systems is summarized and transferred to the Park User Statistics Summary (P.U.S.S.) sheet to record monthly camping statistics. This includes data on camping party nights and turnaways.

The Standard Camping Permit provides information on camping party nights and average camping party size (by means of a periodic survey of camping permits). Combining this information enables calculation of individual camper nights (see Glossary, page 10). Camping party nights are based on the premise that a site is considered occupied when a permit has been issued and that site is occupied by the permittee and at least one camping accommodation unit. An attendant using a campground turnaway tally sheet, records on a monthly basis, each time a camping party is personally turned away because no campsites were available. This information is then recorded on P.U.S.S. sheets and is presented in this report.

Self-Registration Permits also provide statistics on camping party nights, but require a periodic self-registration camper survey to provide data on camping party size. Turnaway counts are not always applicable owing to the self-administered nature of registration.

Campground occupancy data are determined from analysis of: (1) campground capacity, (2) number of weekday and weekend days in a specific month, (3) number of sites affected by a closure per day (Note: for the 1986/87 fiscal year, closures were not taken into account in calculating occupancy due to a system problem), and (4) total camping party nights per month. Refer to the Glossary for the calculation procedure of campground occupancy rate and average daily percent campground occupancy. In addition, overflow party night figures are included in the occupancy data tables whenever appropriate. This figure represents the monthly totals of overflow camping party nights and is reported at the park level only.

Where possible, (depending on availability of information) previous years' camping party night figures are tabulated in a historical comparison table and graph, for a five year period.

Day Use Statistics

An evaluation of data collection procedures in 1981, concluded that a non-systematic and inconsistent methodology of data collection resulted in day use statistics which were not considered to be accurate. Consequently, a day use study was instituted in 1983 and since then, all provincial parks outside Kananaskis Country have been surveyed. A study of day use in Kananaskis Country is currently underway. As a result, this report does not include day use statistics for Kananaskis Country.

Day use statistics are now based on figures collected from automatic traffic counters. Adjustments to these values are determined by the ratio of day use vehicles to all other vehicles entering the park and mean party size. For the peak season, both adjustments are obtained by a periodic (every four years) day use study. The day use study involves the stopping of traffic on 20 randomly selected days during the summer, to conduct a brief interview. Both this information and the daily vehicle counts are analyzed to yield estimates.

Due to resource constraints normally associated with off-season park operations, an alternate method to the day use study is, however, necessary to collect information on the aforementioned adjustments. Estimates of the information required to obtain day use visitation figures are currently provided by park staff, based on their experience of visitation patterns at their park. This includes the average number of occupants per day use vehicle, monthly weekday/weekend percent day use figures, and in some cases, actual estimates of day use visitation. The collection methodology for off-season day use statistics, is currently under review. Changes, if any, will be implemented in the 1987/88 off-season.

A historical comparison table, and graph of day use parties is also included in this report.

Group Use Statistics

Group camping information was previously not reported since there was no standardized system for collecting group use statistics. Consequently, the historical comparison table and graph only includes information for the 1986-87 fiscal year. Currently, the group use permit system enables collection of information pertaining to group camping unit nights, individual group camper nights, and occupancy. A survey component of the group use permit (every four years) provides the average number of people in a group unit. This figure is required to calculate individual group camper nights.

Provincial Recreation Areas

The provincial recreation area vehicle count program was initiated in 1982 and presently forms the basis of annually derived P.R.A. visitation statistics. Whereas in the past, a separate report was prepared for P.R.A. statistics, this report will provide peak season information on camping party nights and day use parties at P.R.A.'s throughout the province. Since there is currently no formal, consistent method of collecting off-season P.R.A. statistics, none are reported.

Visual vehicle counts taken during both ranger patrol and maintenance visits to P.R.A.'s form the basis of the day use and camping statistics derived. The initial counts are divided into camping parties and day use parties, based upon the percentage split from the 1982 Wayside Recreation Area Survey. The final day use figures are determined by including a length of stay factor, also from the 1982 survey. This accounts for the turn-over rate in the day use traffic at each site. Although the results reported are admittedly not accurate figures, they are however, best approximations given the current general operating procedures for provincial recreation areas. Nevertheless, it is important to note that for comparison sake, the statistics do indicate the relative amount of use that each of the P.R.A.'s receive.

Several appendices are included in this report to complete the information requirements relevant to the reporting of Park User Statistics. As a final note, amendments to the 1986 Peak Season Statistics are summarized in the tables included in Appendix I, pages 351 to 362.

Alberta Recreation and Parks is pleased to provide for your use, the first annual "Park User Statistics - Fiscal Year Summary" report. Inquiries requiring further explanation of the methodology are welcomed, and should be directed to Barry Bentham at 427-2968.

GLOSSARY OF TERMS

CAMPING

AVERAGE CAMPING PARTY SIZE:

Average number of people in camping parties. This is determined for each area by a periodical survey of camping permits.

* AVERAGE DAILY (WEEKEND/
WEEKDAY/TOTAL) PERCENT
CAMPGROUND OCCUPANCY:

SUM
OF:

TOTAL CAMPING PARTY NIGHTS FOR SPECIFIC TIME
PERIOD

(CAMPGROUND - # OF SITES)	X	NUMBER
(CAPACITY AFFECTED BY)		OF DAYS
(PER GIVEN CLOSURE PER)		
(DAY GIVEN DAY)		

CAMPGROUND OCCUPANCY RATE:
(NUMBER OF NIGHTS AT
PERCENT OCCUPANCY)

CAMPING PARTY NIGHTS FOR A GIVEN DAY X 100

CAMPGROUND -	NUMBER
CAPACITY	OF SITES
FOR A	AFFECTED
GIVEN DAY	BY CLOSURE
	FOR A
	GIVEN DAY

Note: Sum the number of nights for a specific percent occupancy.

CAMPING ACCOMMODATION UNIT:

A tent, a tent trailer, a travel trailer, a motor home, a van, or a truck camper.

CAMPING PARTY NIGHT:

One site occupied for one night.

CAMPING PARTY SIZE:

The total number of people present on an occupied site (regardless of the number of camping accommodation units occupying a site).

* NOTE: For the 1986/87 fiscal year, closures were not taken into account in calculating occupancy due to a system problem.

... continued ...

GLOSSARY OF TERMS ... continued

GROUP AREA NIGHTS AVAILABLE:	NUMBER OF GROUP USE AREAS	X	NIGHTS - PER MONTH	GROUP AREAS CLOSED PER MONTH	X	NIGHTS AFFECTED
GROUP AREA NIGHTS OCCUPIED:	Sum of the number of nights a group use area has been actually occupied over a specified period of time.					
GROUP CAMPING UNIT NIGHT:	One camping accommodation unit in an area, designated as a group use area for one night.					
INDIVIDUAL CAMPER NIGHTS:	Average camping party size X camping party nights.					
OCCUPIED SITE:	A site for which a permit has been issued that is occupied by the permittee and at least one camping accommodation unit.					
OVERFLOW PARTY NIGHT:	One camping accommodation unit in an area designated as an overflow area for one night.					
SITE NIGHTS AVAILABLE:	CAMPGROUND CAPACITY	X	NIGHTS - PER MONTH	SITES CLOSED PER MONTH	X	NIGHTS AFFECTED
TOTAL CAMPING PARTY NIGHTS:	The monthly or seasonal totals of the individual daily sums of camping party nights.					

... continued ...

GLOSSARY OF TERMS ... continued

TURNED AWAY PARTY:

A party which has been informed, by a park representative, that they cannot be accommodated on account of all available sites being occupied at a specified time.

DAY USE

AVERAGE DAY USE PARTY SIZE:

Average number of people associated with a vehicle entering a provincial park or provincial recreation area for one day or portion of one day without staying overnight. This is determined by a periodical survey of day users.

DAY USE PARTY:

A number of people in a vehicle entering a Provincial Park or Provincial Recreation area for one day or portion of one day without staying overnight.

NOTE: In the case of "walk-in" day users, a party is considered to be one or more individuals who appear to enter the park together.

INDIVIDUAL DAY USERS:

Person(s) making a recreational visit to a Provincial Park or Provincial Recreation area for one day or portion of one day without staying overnight.
